

CHA L-0454

Copy No. 4

24 December 1958

MEMORANDUM FOR: Director of Materiel, DPS/DCI

THROUGH : Deputy Director, DPS/DCI

SUBJECT : Availability of Med Kits

REFERENCE :

1. The referenced cable is an example of communications we receive periodically which list the modification status of aircraft at the 2 Detachments. As a rule, these messages indicate that certain items required for modification are yet to be furnished to (or yet to arrive at) the Detachment in question. I assume that the Director of Materiel reviews such communications and keeps himself informed about the availability of mod kits. It would seem to me appropriate where the kits are reported as still unavailable or incomplete to make modifications called for sometime in the past, to inquire of as to the reason for the delay.

2. Perhaps you would mention in our next staff meeting your normal practice in this matter.
